DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-9, 39-41, 42,49, and 50-68**, drawn to an ingestible device, classified in class 604, subclass 93.01.
- II. **Claims 10-28**, drawn to a transmitter, classified in class 604, subclass 890.1.
- III. **Claims 33-38 and 69-80**, drawn to an ingestible device having a transmitter and receiver, classified in class 604, subclass 891.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because transmitters are used in the medical arts for other uses such as sensing and telemetry devices. The subcombination has separate utility such as a drug container.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and

(2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because transmitters are used in the medical arts for other uses such as in sensing and telemetry devices. The subcombination has separate utility such as a drug container.
